Subject index

Accessory sex glands
  involvement in the regulation of pituitary hormones 255
Acrosome reaction
  human, effect of zinc 229
  in sperm of various semen profiles 43
Androgen receptor
  effect of testosterone deprivation 182
immunohistochemical demonstration on testicular blood vessels 425
Anosmia, effect on gonadal maturation 246
Antisperm-antibodies, effect of isotypes 220
Autoimmune orchitis, an experimental model induced by transfer of a T-cell line 170
Azoospermia, relationship to inquinal surgery 504

Blood–testis barrier 1

Capacitation
  human, effect of culture techniques on chromatin stability 293
  in sperm from men with various semen profiles 43
  rat, oxygen consumption related to a diesterase 345
Clomiphene, citrate efficacy for the treatment of idiopathic male infertility 299
Coagulating gland
  rat, role in fertilization 54
Coagulum, role of high molecular-weight proteins in formation 308
Contraception
  male, effect of ketoconazole on reproductive function in male rats 376
  male, residual sperm function in oligozoospermia induced by testosterone enanthate 416
  passive immunization against prostatic 'inhibin' 114
Cryptorchidism
  human, treatment with LHRH 135
  pattern of Sertoli cell degeneration 19

Epididymis
  rat, acidification of fluids after varicocele 238
  rat, effect of testosterone deprivation on androgen receptor 182
  rat, separation of phospholipase A_2 62

Gonadotrophins
  changes in serum level in male rats bearing DHT-implants 355
  influence on testicular blood flow 365
  involvement of the accessory sex glands in the regulation of blood levels 255
  therapy with hCG in hypogonadal men 320

Hypogonadism
  effect of testosterone treatment on serum vitamin D and IGF-I 93
  therapy with hCG alone 320
Hypo-osmotic swelling test, reappraisal to improve assessment of fertility 5

Impotence, erectile dysfunction 199
Inhibin
  hamster, prostatic 'inhibin' as a male contraceptive 114
  rat, effect of peritubular cell secretions on production 73
Infertility
  sperm chromatin stability and zinc binding properties 103
  treatment with clomiphene citrate 299

LHRH
  human, doubtful value in management of the non-descended testis 135
Leydig cells
  rat, effect of peritubular cell secretions on steroidogenesis 73
  rat, influence of testicular macrophages 144

Microcirculation
  rat, a forgotten essential in andrology 285
  rat, influence of FSH and PMSG 365
  rat, maintenance by testosterone in Leydig cell-depleted animals 385
  androgen receptors in testicular blood vessels 425

Oligozoospermia
  treatment with tamoxifen 14
  residual sperm function induced by testosterone 416

Paracrine factor (P-Mod-S), effect on steroidogenesis and inhibin production 73
Phospholipase A_2
  in the testis and cauda epididymis of rat 62
  purification from bovine prostate 394

Reactive oxygen species, produced by human

spermatozoa with a luminol analogue 211

Seasonal breeding, functional differences between macrophages from active and regressed testes 263
Semen
human, effect of isotypes of antisperm antibodies on quality 220
human, quality improvement after varicocele treatment 338
Semen analysis
and fertility prognosis 473
aniline blue staining for histones 330
enhanced detection of reactive oxygen species 211
measurement by sperm DNA fluorescence using flow cytometry 407
subnormal parameters, fertilization and pregnancy rates 485
Seminal plasma
human, deficiency in high molecular-weight coagulum proteins 308
Seminal vesicle
castration resistant secretion does not depend on androgens 435
rat, role in fertilization 54
Sertoli cell
degeneration in cryptorchid testes 19
human, secretory proteins in semen and blood 201
Sperm
human, capacitation and acrosome reaction monitored by a fluorescence assay 43
human, chromatin stability and zinc binding 103
human, controlling the swimming speed 127
human, detection of reactive oxygen species 211
human, effect of culture techniques on chromatin stability 293
human, enhancement of performance in HOP-test 32
human, hypo-osmotic swelling test 5
human, nuclear instability and staining 330
human, relationship between quality and chromatin condensation 407
human, sedimentation technique as a test for the fertilizing capacity 498
rat, alterations in oxygen consumption in differing functional states 345
Sperm motility
human, effect of zinc 229
rat, effect of ketoconazole on epididymal spermatozoa 376
Spermatogenesis
human, induction by hCG in hypogonadism 320
human, monitoring by Sertoli cell- or germ cell-secreted proteins 201

Tamoxifen, in treatment of oligozoospermia 14
Testis
gene transcription 85
hamster, isolation on culture of macrophages 263
human, an organ at risk 373
human, immunohistochemical localization of calmodulin 448
mammalian, microcirculation 285
rat, acidification of fluids after varicocele 238
rat, androgen receptors on blood vessels 425
rat, effect of testosterone deprivation on androgen receptor 182
rat, influence of macrophages on Leydig cell function 144
rat, peritubular cell secretions 73
rat, separation of phospholipase A_2 62
Testosterone
action, deficiency, substitution 282
changes in serum levels in male rats bearing DHT implants 355
effect of ketoconazole on plasma concentration 376
effect of vitamin D metabolite and IGF-I 93
in mature scorbutic mutant rats 160
rat, effect of deprivation on androgen receptor 182
rat, maintenance of testicular blood flow and vasomotion in Leydig cell depleted animals 385

Varicocele
acidification of testicular and epididymal fluids in the rat after surgical induction 238
efficacy of embolization versus ligation of spermatic vein 338
Vasectomy
intravasal injection of silicone rubber 460
recovery of fertility after removal of plugs 465
reversible 455
safety of percutaneous injection of elastomer plugs 468

Zona-free hamster oocyte penetration test, use of human follicular fluid or egg yolk medium 32
